

# Hands-on session #1 – Building the programme theory

## 1. Please develop a **programme theory** for the “**Green and digital transitions in SMEs**” axis (PA 11) using the available documentation

- The 2 pages document presenting the intervention and its planned evaluation
- The cards to be fulfilled:
  - the *Interventions* cards (what do you deliver?) first
  - the *Aim of the intervention* cards (expected changes?)
  - And the *Results* cards (what are the steps or links from intervention to change? Who gains/does what with your intervention)

## 2. When your theory is ready, please, identify **conditions** for success, using the dedicated cards

- the conditions cards to be placed at different places along the theory
